

**It is a pleasure to connect!**

This pamphlet is a short introduction to me  
+ a unique skill set to I have to share:

**joan trink pham** 

Artist / Hand Reader / Palliative Care Nurse

## About Me

I never could have ever imagined that in my life I would embark on a professional + entrepreneurial journey that would include modern palmistry.

My exploration into this fascinating modality began in the summer of 2013 when I happened to attend a hand reading circle intended to be part of a welcome back celebration for a couple of dear friends.

It was in this circle that I met **Richard Unger**, founder of modern scientific Hand Analysis. His short hand reading of my hands offered me a way to deeply appreciate and contextualize my life in a way that was inexplicably transformative - I felt a clarity + self-acceptance experienced as a lighter way of being.

As you can imagine, I quickly become engrossed in understanding the mechanics of this non-predictive modality. I wanted to be able to understand how any person could learn how to decode the fingerprints and lines of the hands to share such depth + precise insights.

What started as burning desire to understand has led me to become an Advanced Certified Hand Analyst in a short period of time with a credit of reading over one thousand pairs of hands to date.

## Hand Analysis

is a tool for me to appreciate a person's unique gifts, special talents + soul-level life purpose fulfillment possibilities

### **I am a meaningful conversation specialist.**

Hand Analysis allows me to use skills + insight developed over more than a decade as a hospice palliative care nurse to talk about the deeply meaningful things that matter to us as individuals.

Reading a person's hands as an architectural blueprint of their personality + soul orients the conversations I facilitate to provide clarity, affirmation and self-illumination. These conversations can be life-changing.

**Are you curious to know more about Hand Analysis?**

Please read on ...

## Hand Analysis

is a modern form of ancient palmistry. It integrates Western and Eastern traditions of hand reading with a current understanding of neurobiology. This form of palmistry is not predictive. Instead of telling the future, Hand Analysis is a powerful self-awareness tool that takes into account personality and soul context with an aim to empower people to live deeply meaningful and authentic lives.

### How?

The overall shape of the palm + fingers reveal your basic temperament, the thumb speaks to how you get things done and the 12 zones of the fingers indicate personality strengths + challenges. The lines in your hands are wired to your thinking processes and reflect neurological activity. As your thinking and behaviour change over time, consequently, so do the lines of your hands. The palmar lines show how you love, how you think and what your unique talents are.

Scientific Hand Analysis has been developed and popularized by Richard Unger, Master Teacher and reader of over 60,000 pairs of hands during a 44 year career. He is also the creator and Director of the

International Institute of Hand Analysis

**Peace**

**Wisdom**

**Service**

**Love**

## Why?

Richard Unger's most significant contribution to modern palmistry is the deciphering of a person's Life Purpose by way of their fingerprints. Each person has a distinct set of fingerprints that began forming even prior to birth. These 4 fingerprint designs represent themes of Service, Wisdom, Love + Peace consciousness. They can be read to understand life-long themes including life purpose (ways of being that are deeply meaningful and feel profoundly connective / fulfilling) as well as life lesson (ways of being that incite deep subconscious fear + thus, areas for one's most potential growth and illumination in this lifetime).

# Testimonials

I received a lovely, insightful reading of my palm and finger tips by Joan. I felt that she spoke very much from the heart and with a unique sensitivity. Joan finished my session with mention of what my life lesson would be and I am now intrigued to notice that her very her very words are matching my experience. I had the honour of being in a group reading and therefore heard what she said to other people and was impressed with her gentleness and yet her gutsy delivery.

**LORNA SCHWENK**

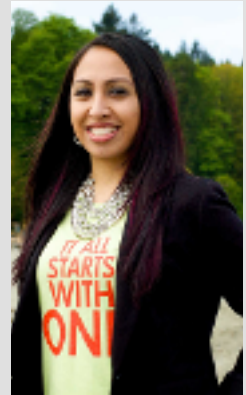

Performing Arts Lodge (PAL Vancouver)  
Hand Reading Circle, June 2015

Not only did this woman read my hand and give me an accurate picture of "who I am" through my hands, she facilitated one of the most gentlest conversations about my grandfather when he was still alive, ensuring that my family was emotionally prepared for his death. If you are in need of either, you must go see Joan.

**SANDRA GARCIA**

President + Director of Good Media  
[Link to Sandra's Blog Experience](#)

I came to Joan at a time when I sought validation in times of extreme life change, and was clamouring to make sense of it all. I had no idea what to expect - and BOY was I blown away! I knew it would be special, but I had no idea how special this reading would be.

From this reading, I have the takeaway of clarifying some questions I've had about what I'm here on earth to accomplish, and validation that the struggles I've been experiencing are indeed no small feat -- there is some comfort in knowing that it's actually part of my soul's quest to overcome challenges that, while seemingly easy for others, are difficult for me.

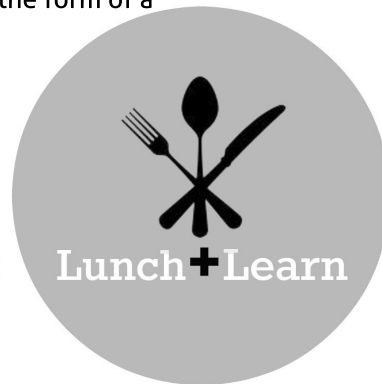

**MEGAN PHILLIPS**
